

Analyse & Evaluate with Confidence, Fast

GYDE365-Discover is a revolutionary way to determine if Microsoft Dynamics 365 is right for your business. Supported by Microsoft and developed by a team of industry experts, it allows you to make an informed decision as to whether implementing Dynamics 365 will give you the business tools and capability you need.

Overview

The decision to implement a new business application is not without risk. Have all of our requirements been captured? Which solution should we choose? Will it do everything we need? How long will it take? How much will it cost? Who do we choose to make it happen?

The traditional process for answering these questions accurately is both time-consuming and costly, taking on average at least three months. It typically involves numerous, lengthy, information-gathering workshops and feedback sessions over extended periods of time, often with multiple parties.

GYDE365-Discover provides organisations like yours with a significantly more cost-effective alternative. For a fixed price and at a third of the cost of other methods, you are empowered to make an informed decision as to whether Dynamics 365 is a good fit for your business, in a matter of days, not months.

Using an online, survey-driven application, your team members can answer a series of role-specific, non-technical, business-level questions, at a time that is convenient for them. Once complete, you will receive a detailed output document, providing you with all the information you need to make an informed decision about Dynamics 365.

Our Approach

1. Short customer onboarding session
2. Customer completes survey questions
3. Reviewed by specialist consultants
4. Joint online review workshop
5. Final edits based on customer input
6. Output Pack sent to the customer.

Key Deliverables

- **Detailed gap/fit analysis** - understand the fit of standard Microsoft Dynamics 365 for your business needs and identify areas where additional investigation is needed
- **High-level solution blueprint** - easily create an RFP (Request for Proposal) document for benchmarking potential implementation partners, or even other software vendors, if required
- **Indicative costs** - obtain estimates for the deployment of Dynamics 365, including software, external consultancy, internal resources and ongoing costs, enabling you to build a more accurate business case, with confidence.

Duration & Costings

- **Time:** 16 hours of input from your team
- **Cost:** Fixed price; available on request.

Key Benefits

- **Expertise** - leverage our vast experience, gained from 1000+ system selection and implementation projects
- **Convenient** - complete the business analysis surveys anytime, anywhere
- **Faster** - complete your Dynamics 365 evaluation in days, not months
- **Less money** - complete your selection phase for a fixed price and at a third of the cost of less effective methods
- **Informed** - use the Output Pack to create a meaningful RFP for benchmarking potential suppliers
- **Empowered** - build a better business case for your project, with greater confidence.

About Seer 365

Our mission is to revolutionise the Microsoft Dynamics 365 implementation model, from system evaluation through to deployment, empowering organisations to achieve greater success. Using our team of experts, who have been involved in 1000+ system evaluation and implementation projects, we create transformative applications and services that help standardise, simplify and automate project tasks to reduce cost, minimise risk and save valuable time.
